Local Government Reform Awareness

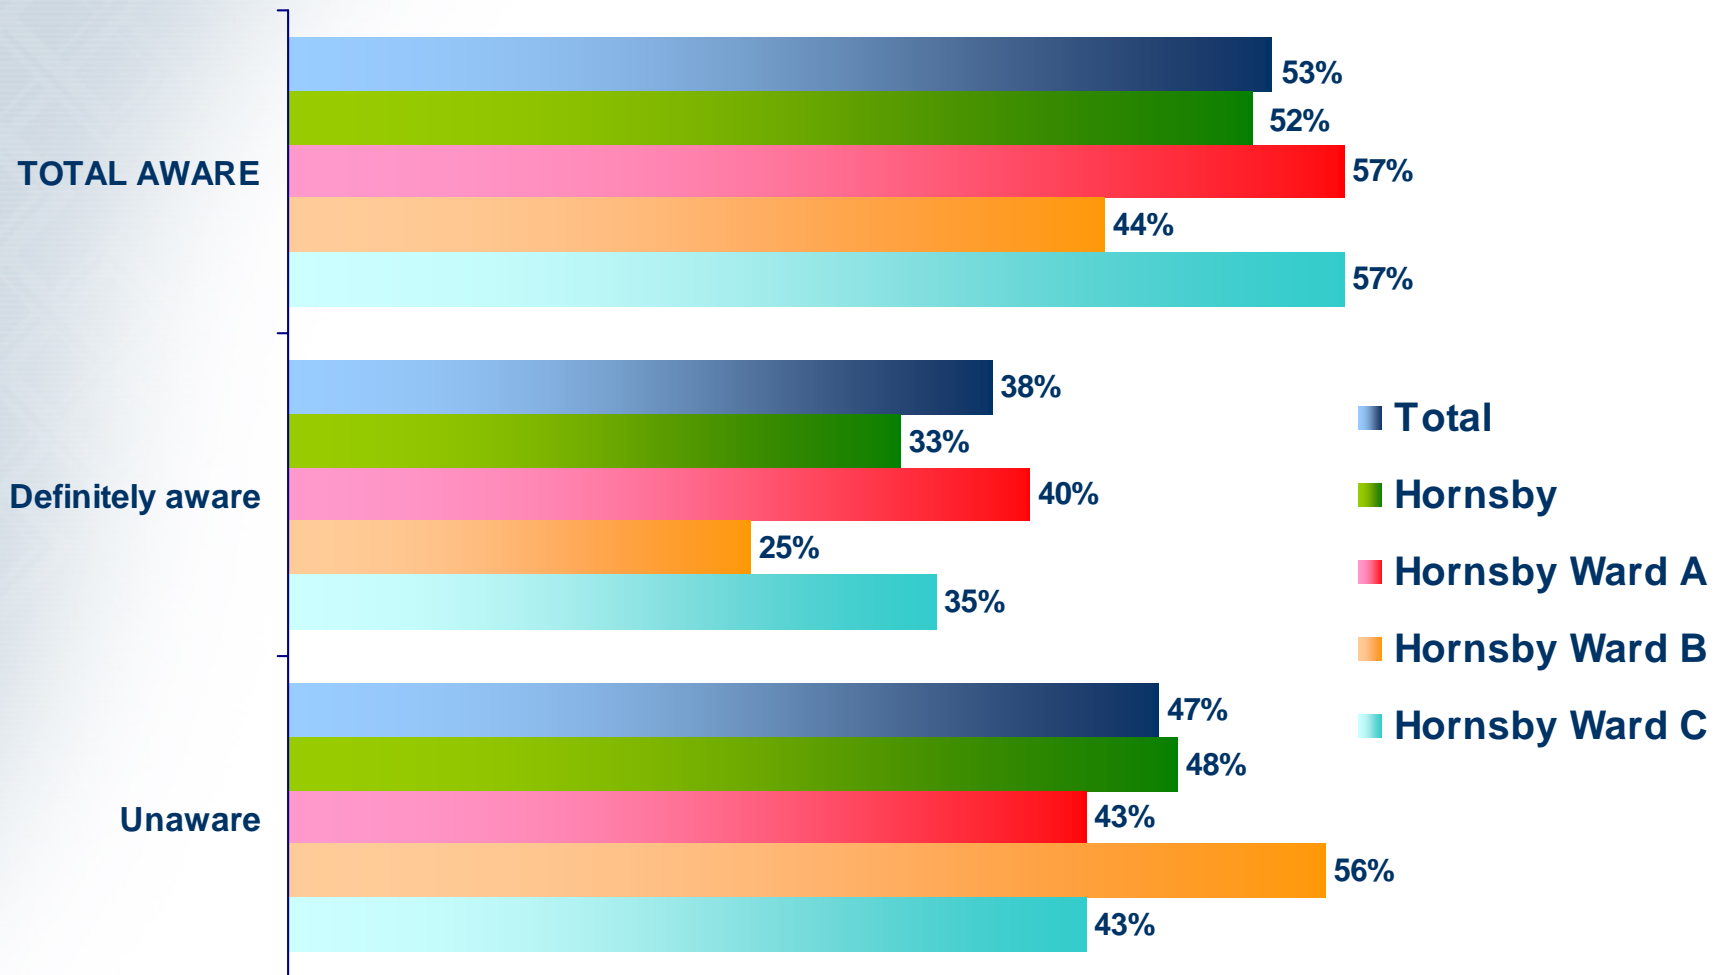

Awareness question:

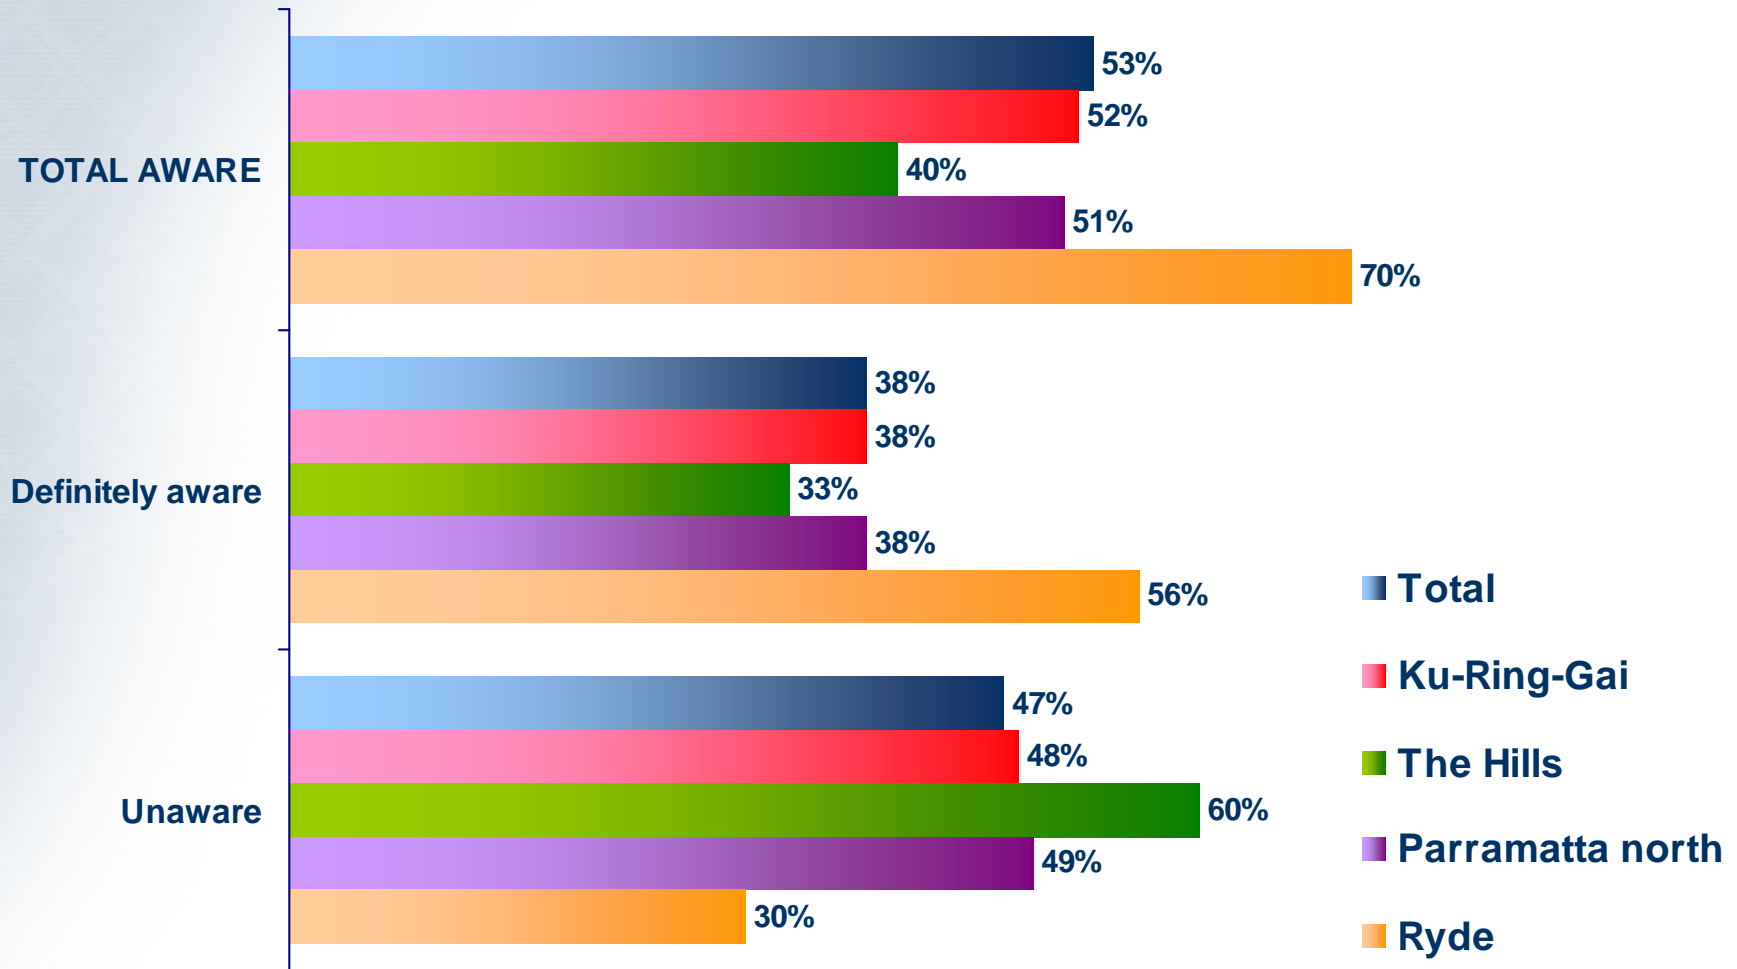

‘Now I want to talk about proposed changes to local government – or councils – in New South Wales.’

The Independent Local Government Review Panel has recommended changes to local councils, and it has asked Hornsby Council for its views, and Hornsby Council is asking residents in the area what they think. Proposals may include boundary changes, amalgamation or sharing services with nearby councils. Your council area might be involved in these changes.’

Awareness of proposals is split at the moment, with more than one third affirming they are 'definitely' aware. Residents in Hornsby Ward B are less aware of proposals.

Ryde north residents are more aware of proposed changes, but relatively few in The Hills.

Local Government Reform Opinion & options

■ Methodology

- > Respondents were asked initial opinions of four options for change and reasons for support or opposition
- > Not all respondents were asked about all options (see table next slide)
- > All respondents were asked which of three main amalgamation options they preferred
- > They were then asked again their considered opinion of the preferred broad options (including 'no change')
- > Those who preferred 'no change' were then asked to choose 'if they had to' which of the broad change options they preferred
- > For brevity we have given each option a short title, though this was not used in the survey to avoid language bias
