Introduction

This document has been prepared to assist in the understanding of the Hornsby Local Environmental Plan (HLEP) 2013. It provides a plain English explanation of the provisions of the HLEP, along with the background to its preparation and the requirements of the NSW State Government in the preparation of the Plan.

In September 2005, the NSW Government introduced a range of reforms aimed at streamlining the planning system. Under the reforms, all NSW councils are required to prepare a new Local Environmental Plan (LEP) in accordance with the State Government's standard LEP template (*Standard Instrument*), which specifies the form and content of new LEPs for a local government area. The *Standard Instrument* (LEPs) Order 2006 came into effect on 31 March 2006. Council was given five years to prepare its new LEP. In February 2007, Council resolved to prepare a new LEP based on the *Standard Instrument* and that it principally be a process of transferring Council's adopted strategies and existing planning instrument (*the Hornsby Shire Local Environmental Plan (HSLEP) 1994*) into the new LEP format.

The *Standard Instrument* identifies the standard zones and zone objectives, mandates certain permitted and prohibited uses in zones, and identifies compulsory and optional provisions. Other provisions relevant to local planning issues can be added but only with the approval of the NSW Department of Planning and Infrastructure (DP&I) and the Minister.

These explanatory notes set out each clause in the HLEP and provide a brief explanation of what the clause aims to do. Where relevant, it also explains any significant changes from the *HSLEP*. Appearing in brackets after each clause is an indication of whether the clause is compulsory or optional, or whether Council has added it as a local provision. For the purposes of exhibition of the draft LEP, compulsory and optional provisions were identified in black, local provisions were identified in red. Notes do not have legal force but must be included for interpretation.

About the Plan

The HLEP controls development and guides planning decisions made by Council. It also aims to ensure that new development is sustainable and compatible with the character of the Shire.

In accordance with Council's resolution in 2007, the planning provisions of the *HSLEP* have formed the basis of the new HLEP. These provisions have been supplemented by local planning studies prepared by Council to meet its obligations under regional planning strategies. These local planning studies include:

- Waterways Review 2006
- River Settlements and Foreshores Review 2007
- Rural Lands Planning Provisions Review 2009
- Ku-ring-gai & Hornsby Subregional Employment Study 2010
- Dural Service Centre Study 2010
- Hornsby Shire Housing Strategy 2010
- Native Vegetation Planning Review 2010

The HLEP has been prepared based on the *Standard Instrument*, the Practice Notes and Circulars issued by the Department of Planning and Infrastructure, and Council's existing adopted strategies. The *Order*, the *Standard Instrument* and Practice Notes and Circulars can be found on the NSW Department of Planning website, www.planning.nsw.gov.au. The DP&I also released mapping guidelines which specify the map templates, scale and grid, colours, lines, symbols, codes and naming protocols.

The preparation of the HLEP has involved extensive consultation, including consultation with relevant public authorities and review by key staff and Councillors through a series of workshops. Regular workshops were also held with representatives of the DP&I throughout the preparation of the Plan.

The Plan is divided into 6 parts, being Part 1 - Preliminary, Part 2 - Permitted or Prohibited Development, Part 3 Exempt and Complying Development, Part 4 - Principal Development Standards, Part 5 - Miscellaneous Provisions, and Part 6 - Local Provisions. The Plan also includes a Dictionary and a number of Schedules. As with the existing *HSLEP*, the Plan is intended to be used as a land use policy plan and not a definitive statement for detailed development control. Council has also prepared a new Development Control Plan (DCP) which has amalgamated the former 32 DCPs into one and provide more detailed controls relating to the type of development proposed.

Part 1 - Preliminary

Clause 1.1 Name of Plan (compulsory)

This Clause identifies that the name of the Plan is Hornsby Local Environmental Plan 2013.

Clause 1.1AA Commencement (compulsory)

This Clause indicates that the Plan commences two weeks after it is published on the NSW legislation website. The Plan was published on the NSW legislation website on 27 September 2013. Accordingly, the Plan came into effect on 11 October 2013.

Clause 1.2 Aims of Plan (compulsory)

This Clause outlines the overall aims of the Plan, which have been written based on the aims and objectives of the HSLEP and the aims of adopted Council studies which inform the new LEP. The aims of the Plan reflect the following ten themes:

- Vision
- Method - Triple Bottom Line
- Residential
- Employment
- Rural
- Recreational
- Social/Cultural
- Environmental
- Heritage
- Hazards/Risks

Clause 1.3 Land to which Plan applies (compulsory)

This Clause identifies that the Plan applies to land which is shown on the Map accompanying the Plan, called the Land Application Map.

Clause 1.4 Definitions (compulsory)

This Clause specifies that the Dictionary at the end of the Plan is to be referred to for definitions of words and terms used in the Plan.

Clause 1.5 Notes (compulsory)

This Clause explains that notes in the Plan are explanatory notes to provide guidance and are not formally part of the Plan.

Clause 1.6 Consent authority (compulsory)

This Clause explains that Hornsby Shire Council is the consent authority for development applications for land affected by the Plan (unless otherwise stated by the *Environmental Planning and Assessment Act 1979*)

Clause 1.7 Maps (compulsory)

This Clause identifies the maps referenced in the Plan, which include the:

- Land Application Map
- Land Zoning Map
- Additional Permitted Uses Map
- Lot Size Map
- Floor Space Ratio Map
- Height of Buildings Map
- Land Reservation Acquisition Map
- Heritage Map
- Acid Sulfate Soils Map
- Flood Planning Map
- Foreshore Building Line Map
- Terrestrial Biodiversity Map

All maps have been prepared at a base scale of 1:20,000 in a consistent map grid comprised of a maximum of 27 maps to cover the relevant parts of the Shire for each map theme. Some map themes incorporate 1:10,000 map inset sheets to identify additional detail and improve the legibility of the maps.

Clause 1.8 Repeal of planning instruments applying to land (compulsory)

This Clause repeals all local planning instruments and deemed environmental planning instruments applying to the land covered by the Plan, namely the *Hornsby Shire Local Environmental Plan 1994*.

Clause 1.8A Savings provisions relating to development applications (local)

This Clause allows a development application lodged before the commencement of the Plan to be determined under the *Hornsby Shire Local Environmental Plan 1994*, with consideration given to this Plan as if it has been exhibited but not commenced.

Clause 1.9 Application of SEPPs (compulsory)

This Clause outlines that the provisions of applicable State Environmental Planning Policies (SEPPs) apply and prevail over the Plan. However, the Clause also outlines the following SEPPs which do not apply to land to which this Plan applies.

- *State Environmental Planning Policy No 1 - Development Standards*
- *State Environmental Planning Policy No 4 - Development Without Consent and Miscellaneous Exempt and Complying Development (clause 6 and Parts 3 and 4)*
- *State Environmental Planning Policy No 60 - Exempt and Complying Development*

Clause 1.9A Suspensions of covenants, agreements and instruments (local)

This Clause suspends any private agreement, covenant or other similar instrument that would restrict the carrying out of development. Certain circumstances in which the Clause does not apply are also listed, to ensure that public authorities can carry out their duties.

Part 2 - Permitted or Prohibited Development

Clause 2.1 Land use zones (compulsory)

This Clause lists the different land use zones identified in the Plan.

Clause 2.2 Zoning of land to which Plan applies (compulsory)

This Clause specifies that land is zoned in accordance with the particular zone shown on the Land Zoning Map.

Clause 2.3 Zone objectives and land use table (compulsory)

This Clause specifies that the Land Use Table at the end of the part outlines which land uses are allowed in each zone. It nominates whether the land uses are allowed without consent (i.e. without the need for applying for a development application), with consent (i.e a development application is required to be approved first) or prohibited (i.e not allowed at all). The Land Use Table also identifies the objectives of each zone. The objectives have been drafted based on a combination of mandated objectives and zone objectives under the *HSLEP*. The Clause specifies that Council must consider the objectives of the zone when deciding whether to approve a development application.

The Land Use Table has been prepared based on the translation of 34 *HSLEP* zones to one of the 33 mandated zones within the *Standard Instrument*. The *HSLEP* zones have been amalgamated (where required) into 26 equivalent zones chosen from the *Standard Instrument*, as shown in the table below:

Hornsby Shire LEP 1994 (former zone)	Hornsby LEP 2013 (new zone)
Rural AA (Large Holdings - Agricultural Landscapes)	RU1 - Primary Production
Rural AE (Large Holdings - Extraction)	RU1 - Primary Production
Rural AR (Large Holdings - Rural Landscapes)	RU1 - Primary Production
Rural BA (Small Holdings - Agricultural Landscapes)	RU2 - Rural Landscape (south of Galston Village) RU4 - Primary Production Small Lots (north of Galston Village)
Rural BR (Small Holdings - Rural Landscapes)	RU2 - Rural Landscape (south of Galston Village) RU4 - Primary Production Small Lots (north of Galston Village)
Residential A (Low Density)	R2 - Low Density Residential
Residential AA (Low Density - Aquaculture)	R2 - Low Density Residential + CI 2.5 Additional permitted uses
Residential AM (Low Density - Medical Support)	SP2 - Infrastructure - Health Services Facility
Residential AR (Low Density - Rural Village)	R2 - Low Density Residential (Arcadia, Galston & Glenorie Villages) RU5 - Village + R2 - Low Density Residential (Dural Village)
Residential AS (Low Density - Sensitive Lands)	R2 - Low Density Residential
Residential AT (Low Density - Tourist Village)	SP3 - Tourist
Residential B (Medium Density)	R3 - Medium Density Residential
Residential C (Medium/High Density)	R4 - High Density Residential
Residential D (High Density)	R4 - High Density Residential

Hornsby Shire LEP 1994 (former zone)	Hornsby LEP 2013 (new zone)
Business A (General)	B2 - Local Centre
Business B (Special)	B5 - Business Development
Business C (Neighbourhood)	B1 - Neighbourhood Centre
Business D (Aquatic Service Centre)	IN4 - Working Waterfront
Business E (Service Centre)	IN2 - Light Industrial + CI 2.5 Additional permitted uses + B2 - Local Centre
Business F (Town Centre)	B3 - Commercial Core
Business G (Town Centre Support)	B4 - Mixed Use
Business A (General) + Business B (Special) + Business C (Neighbourhood) + Business G (Town Centre Support) + Industrial B (Light)	B6 - Enterprise Corridor
Industrial A (General)	IN1 - General Industrial
Industrial B (Light)	IN2 - Light Industrial
Special Uses A (Community Purposes)	Generally in accordance with adjacent land
Special Uses B (Transport Corridor)	SP2 - Infrastructure
Open Space A (Public Recreation - Local)	RE1 - Public Recreation
Open Space B (Public Recreation - District)	RE1 - Public Recreation
Open Space C (Private Recreation)	RE2 - Private Recreation
National Parks and Nature Reserves	E1 - National Parks and Nature Reserves
Environmental Protection A (Wetlands)	E2 - Environmental Conservation
Environmental Protection B (River Catchment)	E3 - Environmental Management
Environmental Protection C (Tourist)	SP3 - Tourist
Environmental Protection D (Recreation)	E3 - Environmental Management + CI 2.5 Additional permitted uses
Environmental Protection E (River Settlement)	E4 Environmental Living
Unzoned Waterways	E1 - National Parks and Nature Reserves E2 - Environmental Conservation W1 - Natural Waterways W2 - Recreational Waterways

The zones from the *Standard Instrument* do not exactly correlate with the zones from the HSLEP. A number of amalgamations have occurred to ensure “best fit” with the *Standard Instrument*. Details of the zone translations are as follows:

Rural zones

The HSLEP contains 5 rural zones. However, there are only 3 equivalent zones which have been used from the *Standard Instrument*. The RU1 - Primary Production, RU2 - Rural Landscape and RU4 - Primary Production Small Lots zones have been applied generally in accordance with the recommendations of the *Rural Lands Planning Provisions Review 2009*. The Review updated the findings of Council’s *Rural Lands Study 1995* and *Rural Resource Lands Study 2006* and included a land audit to identify land with the highest agricultural potential. The RU4 zone has been applied to land north

of Galston Village and south of Glenorie Village in recognition that the land is most suitable for agriculture and characterised by a two hectare subdivision pattern. The RU1 - Primary Production zone applies to land north of Glenorie Village in recognition that the land is most suitable for agriculture and is characterised by a ten hectare subdivision pattern. The RU2 - Rural Landscape zone has been applied to areas south of Galston Village as the zone best recognises the rural-residential nature of the land.

Residential zones

The *HSLEP* contains 6 different forms of low density residential zoning. However, there is only 1 low density zone in the *Standard Instrument*, the R2 - Low Density Residential zone. This has been applied to the various existing low density residential zones. Similarly, the *HSLEP* contains 3 higher density zonings ranging from medium, medium/high, to high density. However, there are only 2 equivalent zones in the *Standard Instrument*, medium and high density zones. The R3 - Medium Density Residential zone has been applied for the *HSLEP* Medium Density zone. The R4 - High Density Residential zone has been applied to two *HSLEP* zones, the Medium/High and High Density zones. The difference between medium/high and high density development will continue to be distinguished through development controls in the *HLEP* and Council's DCP.

Business and Industrial zones

Land Use Tables in the *HSLEP* are prohibition based, which means that all permitted land uses are listed as being permitted with or without consent, and those not listed are prohibited. The DP&I requires that the Land Use Tables for business and industrial zones be prepared as permissibility based rather than prohibition based to permit newly emerging undefined commercial land uses of merit without the need for a rezoning. Accordingly, the Land Use Tables for the business and industrial zones have been formatted to identify development which is not permitted. All other development would be permissible with consent. Six business zones (B1 - Neighbourhood Centre, B2 - Local Centre, B3 - Commercial Core, B4 - Mixed Use, B5 - Business Development and B6 - Enterprise Corridor) and 3 industrial zones (IN1- General Industrial, IN2 - Light Industrial and IN4 - Working Waterfront) are used in the commercial centres and replace the 7 business and 2 industrial zones from the *HSLEP*. The zones have been applied generally in accordance with the findings of the *Ku-Ring-Gai and Hornsby Subregional Employment Study 2010*, the *Dural Service Centre Study 2010* and advice from the DP&I.

Special Purpose zones

The *HSLEP* includes a Special Uses A (Community Purposes) and Special Uses B (Transport Corridor) zone. The Special Uses A zone applies to hospitals, schools, telecommunication facilities, water reservoirs and electricity substations. The Special Uses B zone applies to regional roads and railway corridors.

The DP&I has developed a new zoning approach for Special Uses sites to promote the opportunity for a change of use after the cessation of use for infrastructure without the need for rezoning. In accordance with this approach, most of the 234 sites currently zoned Special Uses under the *HSLEP* have been zoned generally in accordance with the zone applied to the adjoining land. However, there are 11 existing special uses sites which have been zoned SP2 - Infrastructure. Additional potential contamination clearance processes are required to be undertaken in accordance with the *SEPP 55 - Remediation of Land* prior to these sites being zoned in accordance with adjoining zones that permit residential and other sensitive land uses.

Recreation zones

The *HSLEP* includes 3 open space zones, namely, Open Space A (Public Recreation - Local), Open Space B (Public Recreation - District) and Open Space C (Private Recreation). However, there are only 2 equivalent zones in the *Standard Instrument*, the RE1 - Public Recreation and RE2 - Private Recreation zones. Previously, the public recreation zones were split to differentiate between local or district open space and to identify the relevant acquisition authority. Land reserved for acquisition and the relevant acquisition authority is now identified on a Land Reservation Acquisition Map. Therefore, lands previously zoned local and district public recreation have now been amalgamated into the RE1 - Public Recreation zone.

Environmental Protection zones

The *HSLEP* includes 5 environmental protection zones and a National Parks and Nature Reserves zone. However, there are only 4 Environment Protection zones (including a National Parks zone) in the *Standard Instrument*. The *Rural Lands Planning Provisions Review 2009* and the *Waterways Review 2006* provide recommendations concerning the translation of the zones into the *Standard Instrument* format. The Environmental Protection B and D zones from the *HSLEP* have been amalgamated into the E3 Environmental Management zone from the *Standard Instrument*. Additional uses are permitted by Clause 2.5 where there is a strategic need. The Environmental Protection C zone from the *HSLEP* has been zoned SP3 - Tourist.

Unzoned Waterways

The waterways in the Shire are unzoned by the *HSLEP*. The waterways have been zoned in the *HLEP* in accordance with the recommendations of the *Waterways Review 2005*. The majority of the waterways have been zoned W1 - Natural Waterways. Parts of Brooklyn and Berowra Waters have been zoned W2 Recreational Waterways which permits a number of tourism uses. Gazetted National Parks extending over the waterway have been zoned E1 National Parks and Nature Reserves, and protected mangrove, saltmarsh and seagrass communities below mean high water mark have been zoned E2 - Environmental Conservation.

Determining the Permissibility of Development in a Zone

Types of development are defined in the *HLEP* by land use terms and group terms. Group terms, as the name suggests, group more than one related land use term together. Land use terms and group terms may be listed in different parts of the same land use table. Therefore, to determine whether something is permissible in a zone the entire land use table needs to be read.

For example, "tourist and visitor accommodation" is a group term and groups a number of related land use terms including "hotel or motel accommodation", "serviced apartments", "bed and breakfast accommodation", "backpacker's accommodation" and "farmstay accommodation". Where "tourist and visitor accommodation" is listed as being permitted with consent under Item 3 of the land use table, you would still need to check the land uses listed as being prohibited under Item 4 of the land use table because some of the land uses may be pulled out of the group and be prohibited. If "hotel or motel accommodation", "serviced apartments" and "backpacker's accommodation" are listed as being prohibited under Item 4 of the land use table, the land use table should be read as permitting all types of "tourist and visitor accommodation" (including undefined types such as short term rental accommodation) except "hotel or motel accommodation", "serviced apartments" and "backpacker's accommodation".

A Land Use Matrix is contained in the Appendix to these notes which will also assist in determining the permissibility of development in a zone.

Clause 2.4 Unzoned land (compulsory)

This Clause clarifies that any development on land which is unzoned may only be carried out with development consent. The Clause states that when deciding whether to grant consent, Council must consider whether the development will impact on adjoining land and be satisfied that development is appropriate and compatible with adjoining land uses.

Clause 2.5 Additional permitted uses for particular land (compulsory)

This Clause refers to a Schedule at the end of the Plan and states that certain development on certain land nominated in the Schedule is permitted even though the development is not included in the Land Use Table for the zone. This is similar to that previously identified in Clause 22 of the *HSLEP*.

Clause 2.6 Subdivision - consent requirements (compulsory)

This Clause states that development consent is required for subdivision. The Clause includes a note clarifying that if a subdivision is identified as exempt development, it can be carried out without development consent. The Clause also clarifies that the subdivision of a principal dwelling and a secondary dwelling into separate lots is only permissible if each lot created is not less than the minimum size shown on the Lot Size Map.

Clause 2.7 Demolition requires development consent (compulsory)

This Clause states that development consent is required for the demolition of buildings or works.

Clause 2.8 Temporary use of land (optional)

This Clause allows for the temporary use of land, subject to development consent, where it does not compromise future development of the land or have detrimental impacts. The temporary use of land (other than for a sales office) has been limited to 28 days in total, which could be consecutive (ie. a period of one month) or nonconsecutive (ie. one day every two weeks a year). The type of development anticipated to be considered under this Clause would be circuses, special market days or other short term or intermittent community activities.

Part 3 - Exempt and Complying Development

Clause 3.1 Exempt development (compulsory)

This Clause allows certain minor development to be undertaken without development consent in addition to development specified by the State Government's Exempt and Complying Development Policy. The Clause refers to a Schedule at the back of the Plan which lists development considered to have minimal environmental impact. The development listed in the Schedule is permitted without the need to obtain development consent provided that it meets certain standards.

Clause 3.2 Complying development (compulsory)

This Clause allows certain development (in addition to development specified by the State Government's Exempt and Complying Development Policy) to be undertaken with certification by Council or an Accredited Certifier instead of going through the more time consuming development application process. The Clause refers to a Schedule at the back of the Plan which lists development which is considered to be routine, low impact development. The development listed in the Schedule can be assessed as Complying Development provided that it meets certain standards.

Clause 3.3 Environmentally sensitive areas excluded (compulsory)

This Clause specifies that exempt or complying development cannot be carried out on land within an environmentally sensitive area. An environmentally sensitive area is defined and includes wetlands, conservation areas and critical habitat.

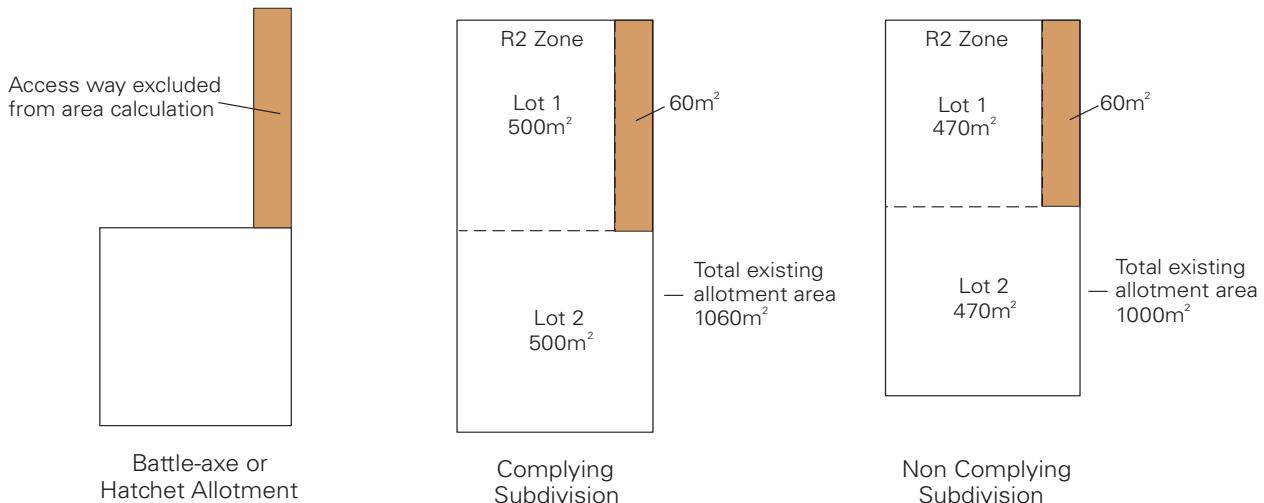

Part 4 - Principal Development Standards

Clause 4.1 Minimum subdivision lot size (optional)

This Clause indicates that there are minimum lot size requirements for the subdivision of land. The various minimum lot sizes are shown on the Lot Size Map. The minimum lot sizes reflect the standards from Clause 14 in the *HSLEP*.

A local subclause has been added to reflect provisions in the *HSLEP* clarifying that the access handle of a battleaxe allotment is to be excluded in lot size calculations.

Figure 1 - Exclusion of batteaxe handle in lot size calculation

The *HSLEP* permits multi-unit housing at a density of 350sqm and 400sqm (without subdivision) in the low density residential zones. The standards were included in the *HSLEP* in 1994 to obtain exemption from the State Government dual occupancy policy at the time and were retained to provide opportunities for relative accommodation, investment rental properties and multi unit housing proposals by the Department of Housing in which dwellings are not sold. The *Affordable Housing SEPP* was gazetted in 2009 and permitted secondary dwellings (i.e. granny flats), in-fill affordable housing and residential development by the Land and Housing Corporation. Accordingly, the existing provisions in the *HSLEP* allowing smaller lot sizes without subdivision in low density zones have not been carried over into the HLEP.

Clause 4.1AA Minimum subdivision lot size for community title schemes (optional)

This Clause specifies that minimum lot sizes shown on the Lot Size Map for various zones also apply to Community title subdivision.

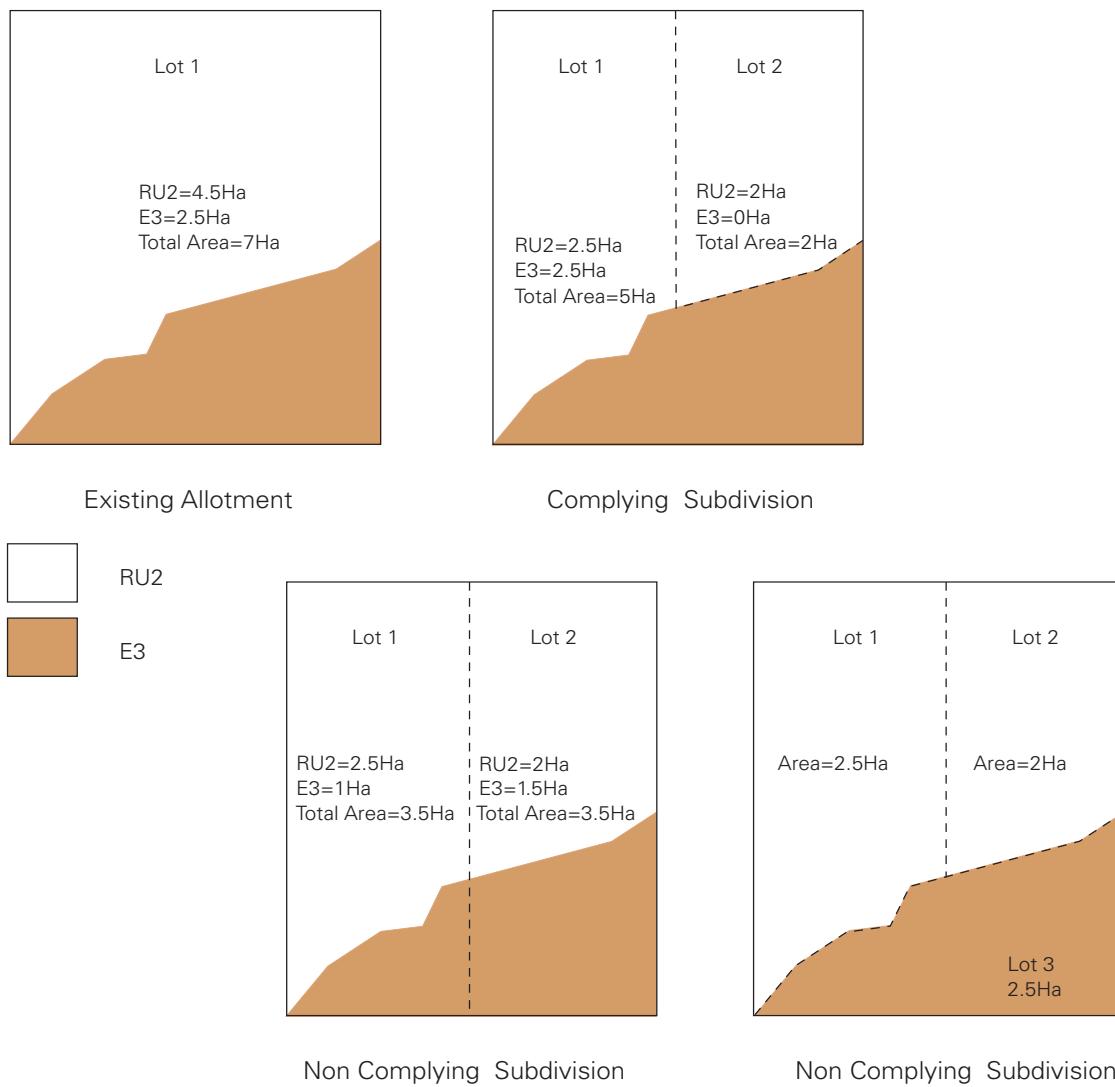

Clause 4.1A Minimum subdivision lot size for strata plan schemes in certain zones (local)

This Clause specifies that minimum lot sizes shown on the Lot Size Map for various zones also apply to the Strata title subdivision of residential accommodation or tourist and visitor accommodation.

Clause 4.1B Minimum lot sizes for certain split zoned lots (local)

This Clause explains the methodology for calculating lot sizes for the subdivision of properties with two zonings.

Figure 2 - Calculating lots sizes for properties with two zonings

Clause 4.2 Rural subdivision (compulsory)

This Clause applies to certain rural zones and allows the creation of a lot smaller than the minimum shown on the Lot Size Map for the purpose of primary production. However, a dwelling is not permitted on the lot.

Clause 4.3 Height of buildings (optional)

This Clause specifies that development must not exceed the height shown on the Height of Buildings Map. Heights are shown in metres on the Height of Buildings Map, as required in the *Standard Instrument*. The equivalent height in storeys has been identified in Council's DCP.

Height requirements have been transferred from the former DCP provisions. Where heights were specified in storeys in a DCP, the height in metres was extrapolated by an urban design consultant for insertion into the Height of Buildings Map.

Height limits in storeys have been translated (where required) into heights in metres as shown in the table below:

Dwellings

Height in storeys	Height in metres
2 storey	8.5m
2 storey (in E4 Environmental Living zone)	10.5m (to accommodate sloping sites in River Settlements)

Townhouses

Height in storeys	Height in metres
2 storey plus attic	10.5m

Walk Up Flats

Height in storeys	Height in metres
3 storey	12m

Multi Storey Apartments

Height in storeys	Height in metres
4 storey	14.5m
5 storey	17.5m
6 storey	20.5m
7 storey	23.5m
8 storey	26.5m
9 storey	29.5m
10 storey	32.5m
11 storey	35.5m
12 storey	38.5m
13 storey	41.5m

In general, dwelling-houses have been identified on the Height of Buildings Map at a maximum height of 8.5m (excluding the E4 zone - see below). However, the former dwelling-house controls restricted the height of dwelling-houses on battleaxe lots to single storey. This could not be incorporated on the Building Height Map as it is impractical to map every battleaxe lot and newly subdivided battleaxe lots can not be included. Accordingly, the 2 storey/8.5m building height limit has been applied and Council's DCP includes controls to manage impacts associated with dwellings on battleaxe lots.

Dwelling-houses in the E4 - Environmental Living zone (properties within the River Settlements) have been identified on

the Height of Buildings Map at a maximum height of 10.5m for a two storey building. This is in accordance with the findings of the *River Settlements and Foreshores Review 2007*, in recognition of steeply sloping sites and the need to minimise cut and fill.

Mixed Use (Business and Residential) Development

Height in storeys	Height in metres
2 storey	8.5m
3 storey	12m
4 storey	14.5m
5 storey	17.5m
6 storey	20.5m
7 storey	23.5m
8 storey	26.5m
9 storey	29.5m
10 storey	32.5m
12 storey	38.5m

Business Development

Height in storeys	Height in metres
2 storey	8.5m
3 storey	12m
4 storey	16m
5 storey	20.5m
6 storey	23.5m
7 storey	29.5m
8 storey	32.5m
9 storey	35.5m
10 storey	40m
12 storey	48m

Industrial Development

Height in storeys	Height in metres
2 storey	10.5m
3 storey	14.5m

Clause 4.4 Floor space ratio (optional)

This Clause specifies that development must not exceed the maximum floor space ratio (FSR) shown on the Floor Space Ratio Map.

As required by the DP&I, the Floor Space Ratio Map includes FSR controls for commercial centres (business and industrial zones). It also shows FSR controls for riverside development (environment protection zones) in accordance with the findings of the *River Settlements and Foreshores Review 2007*. However, there are no FSR controls for residential zones. Instead, a suite of controls to manage bulk and scale, including site coverage, building heights, setbacks, landscaped area and outdoor living area have been included in Council's new DCP. This is consistent with the approach adopted by Council for new five and ten storey housing forms in Housing Strategy precincts and the State Government's Housing Code.

The former *HSLEP* included FSR bonus provisions on certain sites where a community benefit was provided. A local subclause has been included to translate the bonus provisions for certain sites in Hornsby Town Centre, Epping, Berowra Heights and Housing Strategy precinct locations where the specified requirement is met.

Clause 4.5 Calculation of floor space ratio and site area (optional) 4.5

This Clause provides the definition of FSR and explains how FSR is calculated. The *Standard Instrument* mandates the method of calculating FSR and site area which does not exclude the access handle. Accordingly, Council has not been able to retain the control included in the *HSLEP* to exclude the area of the access handle for the purpose of calculating FSR on battleaxe lots. However, the suite of building envelope controls included in Council's DCP will ensure bulk and scale of development is commensurate with the size of the development site.

Clause 4.6 Exceptions to development standards (compulsory)

This Clause allows some flexibility to development standards to allow consent in certain circumstances where a development standard has not been met. The Clause requires the applicant to demonstrate in writing that compliance with the development standard is unreasonable or unnecessary and that there are sufficient planning grounds to justify the non-compliance. The consent authority must also consider the public interest, the objectives of the standard and the objectives of the zone.

This Clause replaces *State Environmental Planning Policy 1 - Development Standards* which was previously available to applicants to demonstrate circumstances where a development standard has not been met.

Part 5 - Miscellaneous Provisions

Clause 5.1 Relevant acquisition authority (compulsory)

This Clause identifies the relevant authority responsible for the acquisition of land reserved for certain public purposes. The Clause also specifies that development for any purpose permitted in the zone may be carried out by a public authority with the consent of Council before it is used for the purpose for which it is reserved.

Clause 5.1A Development on land intended to be acquired for public purposes (local)

This is a local provision which has been inserted to control the scale of development on land intended to be acquired for a public purpose. The Clause is the DP&L's model provision and clarifies that development consent must not be granted on land intended to be acquired unless it is for a purpose specified in the Clause (i.e roads or recreation areas).

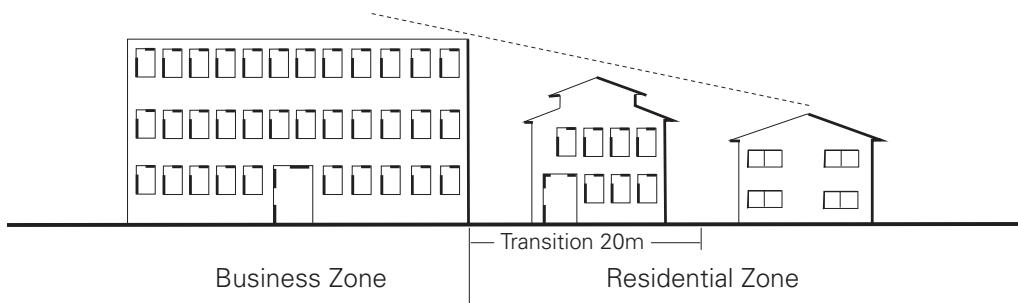

Clause 5.2 Classification and reclassification of public land (compulsory)

This Clause enables Council to classify or reclassify land. All Council land is required to be classified as "community" or "operational" land. Community land refers to land which should be kept for the use of the general public, such as a public park. Operational land refers to land which is not kept for public use, such as a works depot. The *HLEP* does not reclassify any Council owned land for operational purposes.

Clause 5.3 Development near zone boundaries (optional)

This Clause reflects Clause 11 in the *HSLEP* and allows flexibility between the boundary of two zones. The Clause applies to land within 20m of a boundary between two zones and allows consent to be granted for a use allowed on the other side of a zone boundary if it would enable a more logical and appropriate form of development. The Clause does not apply to land zoned RE1 - Public Recreation, E1 - National Parks and Nature Reserves, E2 - Environmental Conservation, E3 - Environmental Management, W1 - Natural Waterways or W2 - Recreational Waterways.

Figure 3 - Development near zone boundaries

Clause 5.4 Controls relating to miscellaneous permissible uses (compulsory)

This Clause provides numerical standards for various land uses (which are defined in the dictionary). The Clause specifies the number of bedrooms or provides square metre limits for bed and breakfast accommodation, home businesses, home industries, industrial retail outlets, farm stay accommodation, kiosks, neighbourhood shops, roadside stalls and secondary dwellings.

Clause 5.5 Development within the coastal zone (compulsory if land to which Plan applies includes land in the coastal zone)

The *Coastal Protection and Other Legislation Amendment Act 2010* (the *Act*) was made in October 2010 and largely commenced on 1 January 2011. The *Act* inserts a definition of "coastal council" in the *Environmental Planning and Assessment Regulations 2000* which identifies that Hornsby Council is a coastal council. Specifically Dangar Island and Milsons Island are declared to be part of the NSW Coastal Zone on the NSW Government's Coastal Zone maps.

Clause 5.6 Architectural roof features (optional)

This Clause specifies that roof features which are decorative elements are permitted, with consent, even if they exceed the heights shown on the Height of Buildings Map. Any roof feature must not include floor space area. This optional Clause has been included as height is now a development standard in the Plan and Council's former height limits do not include plant and lift overruns.

Clause 5.7 Development below mean high water mark (compulsory if land to which Plan applies contains tidal waters)

This Clause requires consent for any development proposed below mean high water mark.

Clause 5.8 Conversion of fire alarms (compulsory)

This Clause requires consent for converting a fire alarm system from connection with the alarm monitoring system of New South Wales Fire Brigades or a private service provider to connection with another private service provider or a different alarm system.

Clause 5.9 Preservation of trees or vegetation (compulsory, except subclause (9) optional)

This Clause is similar to Clause 8 in the *HSLEP*. The Clause aims to preserve trees and vegetation within the area by requiring consent or a permit to prune or remove any tree or other vegetation. However, the Clause specifies that to prune or remove any tree or vegetation that is or forms part of a heritage item, or is within a heritage conservation area, is only permissible with consent (not a permit) unless Council is satisfied that it is of a minor nature or for maintenance of the item and would not adversely affect the heritage significance of the item. The Clause is enacted by the new DCP which prescribes whether an approval or development consent is required based on species, size, location and other relevant matters.

Subclause (9) of the *Standard Instrument* has not been included, as it refers to a clause concerning the *Native Vegetation Act 2003* which does not apply in Hornsby Shire.

Clause 5.9AA Trees or vegetation not prescribed by development control plan (compulsory)

This Clause states that damage to, or removal of, any tree or vegetation not prescribed by a development control plan under Clause 5.9 is permitted without development consent.

Clause 5.10 Heritage conservation (compulsory)

This Clause is similar to Clause 18 in the *HSLEP* and provides for the protection of heritage items, conservation areas and Aboriginal objects and places by requiring consent for certain activities that may harm an item or an area. A heritage item or area is any item or area listed in Schedule 5 and may also be shown on the Heritage Map. The Clause also lists instances where consent is not required, including minor works for maintenance or the creation of a new grave or monument in a cemetery. The Clause means that consent is required for interior and exterior changes, instead of exterior changes only as was previously required in the *HSLEP*. The Clause also only allows items of State and local significance. Accordingly, items of State significance (not listed on the State Heritage Register) and regional significance under the *HSLEP* defaulted to items of local significance in the HLEP.

The Clause also includes conservation incentives, allowing development otherwise not permitted, provided it meets conservation criteria and is undertaken in accordance with a heritage conservation management plan.

Clause 5.11 Bush fire hazard reduction (compulsory)

This Clause allows bushfire hazard reduction work authorised by the *Rural Fires Act 1997* to be carried out on any land without consent.

Clause 5.12 Infrastructure development and use of existing buildings of the Crown (compulsory)

This Clause clarifies that the Plan does not prohibit development by or on behalf of a public authority that is permitted to be carried out without consent under the *Infrastructure SEPP*.

Clause 5.13 Eco-tourist facilities (compulsory if eco-tourist facilities permitted with consent)

This Clause requires the consent authority to be satisfied that the eco-tourist facility is sympathetic to and maintains the environmental and cultural values of the land, and is designed and managed to have minimal impact on the environment.

Part 6 - Local Provisions

General

Clause 6.1 Acid sulfate soils (local)

This Clause aims to ensure that development does not disturb, expose or drain acid sulfate soils and cause environmental damage. This Clause reflects Clause 20A in the *HSLEP*. The Acid Sulfate Soils Map identifies classes of acid sulfate soil and the Clause specifies what type of works require consent and an acid sulfate soils management plan.

Clause 6.2 Earthworks (local)

This Clause has been included as a local provision to replace Clause 9 Landform Modification of the *HSLEP*. Council recognises that earthworks (the filling or excavation of land) has the potential for significant negative impacts in terms of soil erosion, sedimentation, tree loss and drainage impacts. The Clause requires consent for earthworks in all zones so that impacts may be lessened or avoided.

Clause 6.3 Flood planning (local)

This Clause aims to minimise the risk of flood to life and property. The Clause applies to land shown as "Flood planning area" on the Flood Planning Map, as well as other land at or below the flood planning level. The Clause requires that development be compatible with the flood risk of the land and not affect flood behaviour.

Clause 6.4 Terrestrial biodiversity (local)

This Clause aims to protect native flora and fauna and their habitats. The Clause refers to land mapped as "Biodiversity" on the Terrestrial Biodiversity Map. Development consent must not be granted on the land unless potential adverse impacts are considered and the development is designed to avoid, minimise or mitigate adverse impact and includes restoration of disturbed or modified areas. The inclusion of this Clause was recommended by the *Native Vegetation Planning Review 2010* and will work in concert with the trees and vegetation management provisions of Council's DCP.

Clause 6.5 Limited development on foreshore area (local)

This Clause establishes that a foreshore building line applies and is shown on the Foreshore Building Line Map. The Clause specifies that only certain development is permissible in the foreshore area (between the foreshore building line and the mean high water mark). Foreshore Building Lines apply at Brooklyn, Dangar Island, Wisemans Ferry and along the River Settlements. This Clause reflects Clause 20 in the *HSLEP*. However, a Foreshore Building Line has been added for the River Settlements in accordance with the *River Settlements and Foreshores Review 2007*.

Clause 6.6 Restrictons on certain development in Dural Village (local)

This Clause has been included as a local provision as part of a suite of controls to replace existing additional use provisions relating to Dural Village in the *HSLEP* that can no longer be listed as same in the HLEP. The Clause restricts the scale and intensity of specified commercial development that is permitted in the RU5 Rural Village zone. The Clause works in conjunction with a floor space ratio control restriction that has been applied to the land.

Clause 6.7 Location of sex services premises (local)

This Clause specifies locations where sex services premises are permitted (with consent) to minimise land use conflicts and amenity impacts. The Clause requires consideration of the impacts of the proposed development on land that adjoins residential zones or any place likely to be frequented by children.

Schedules

Schedule 1 Additional permitted uses

This Schedule lists land uses which are permitted on certain land in addition to those permitted in the Land Use Tables.

Schedule 2 Exempt development

This Schedule lists development considered to have minimal environmental impact. The listed development may be carried out without the need to obtain development consent, provided that it meets the standards outlined.

Schedule 3 Complying development

This Schedule lists development considered to be routine, low impact. The listed development can be assessed as Complying Development provided that it meets the standards outlined.

Schedule 4 Classification and reclassification of public land

This Schedule lists Council land which is proposed to be reclassified as operational or community land under the *Local Government Act 1993*. No land is proposed to be reclassified under the Plan.

Schedule 5 Environmental heritage

This Schedule identifies heritage items and heritage conservation areas within the Shire. The items and areas are also identified on the Heritage Map.

Dictionary

The Dictionary defines words and expressions used in the Plan. There are a total of 291 terms listed (compared to 127 definitions listed under the HSLEP dictionary). Council cannot add, delete or replace any of the terms listed in the *Standard Instrument*.

Types of development are defined by land use terms and group terms. Land use terms and group terms may be listed in different parts of the same land use table, therefore the entire land use table needs to be read to determine if something is permissible (see Determining the Permissibility of Development in a Zone on page 11 of this document or the land use Matrix in the Appendix for further details).

Appendix

Clause Translation

Clause in HSLEP 1994	Equivalent Clause(s) in new HLEP
1 Name of Plan	1.1 Name of Plan
2 Aims and Objectives of the plan	1.2 Aims of Plan
3 Land to which the plan applies	1.3 Land to which Plan applies

Note 1. Zone B8 Metropolitan Centre is not included in the matrix given this zone may only be used in two nominated LGAs. Zone E1 National Parks and Nature Reserves is not included given there is no need to add any additional uses to the zone. Zones SP1 Special Activities and SP2 Infrastructure are not included given the primary uses in these zones should be annotated on the Land Zoning Map.

Note 2. A type of development referred to in the matrix is a reference to that extent it is not regulated by an applicable State Environmental Planning Policy (SEPP). The following SEPPs in particular may be relevant to development on land covered by this Plan:

- SEPP (Housing for Seniors or People with a Disability) 2004
- SEPP (Infrastructure) 2007
- SEPP (Mining, Petroleum Production and Extractive Industries) 2007
- SEPP (Rural Lands) 2008
- SEPP (Affordable Rental Housing) 2009
- SEPP No 33—Hazardous and Offensive Development
- SEPP No 50—Canal Estate Development
- SEPP No 62—Sustainable Aquaculture
- SEPP No 64—Advertising and Signage

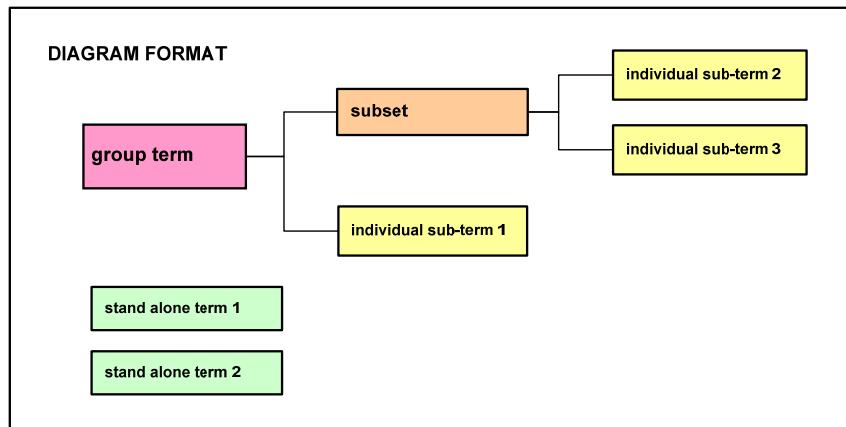

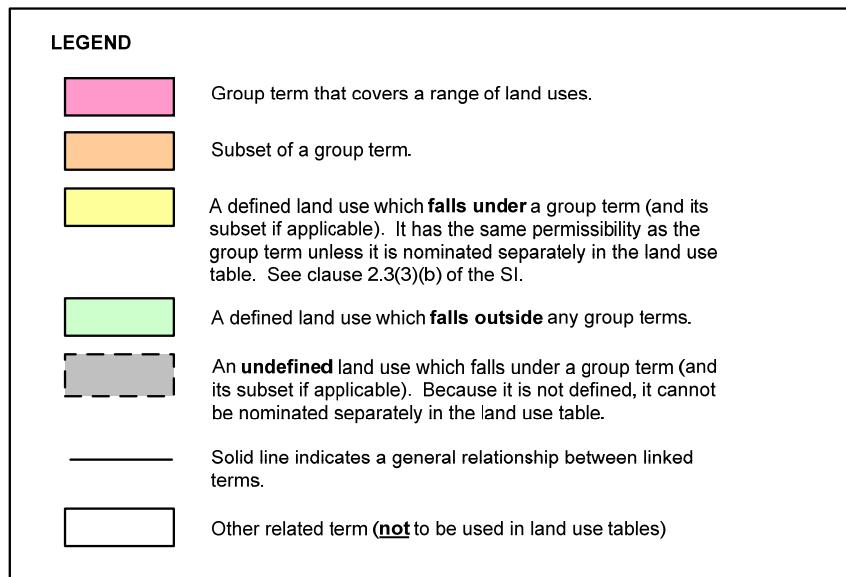

Important note

This information does not constitute legal advice. Users are advised to seek professional advice and refer to the relevant legislation, as necessary.

Disclaimer: While every reasonable effort has been made to ensure that this document is correct at the time of publication, the State of New South Wales, its agencies and employees, disclaim any and all liability to any person in respect of anything or the consequences of anything done or omitted to be done in reliance upon the whole or any part of this document.

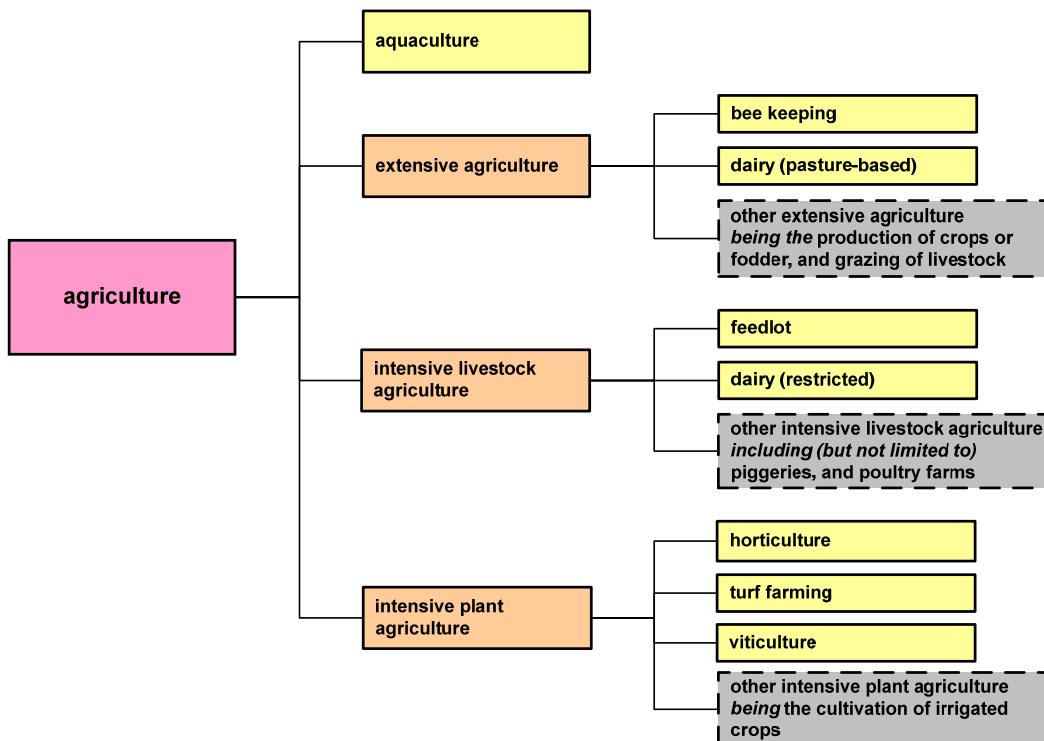

The following diagrams show the relationships between group terms and land use terms which will assist with determining the permissibility of development in a zone. Group terms, as the name suggests, group more than one related land use term together. Land use terms and group terms may be listed in different parts of the same land use table. Therefore, to determine if something is permissible in a zone the entire land use table needs to be read.

The diagrams have been extracted from a Practice Note (PN11-004) issued by the Department of Planning. The full practice note can be viewed at www.planning.nsw.gov.au under “Local Planning” > “LEP Practice Notes and Planning Circulars”.

OTHER MISCELLANEOUS LAND USES

LAND USE terms WITHIN **signage** group term:

LAND USE terms relating to recreation

Examples:

boat launching ramp	jetty	recreation area	water recreation structure
boat shed	marina	recreation facility (indoor)	
charter and tourism boating facility	mooring	recreation facility (major)	
environmental facility	mooring pen	recreation facility (outdoor)	

Other miscellaneous **LAND USE** terms

Examples:

cemetery	environmental protection works	mortuary
crematorium	flood mitigation works	

Other related terms NOT to be used in LAND USE TABLES

Examples:

advertisement	coastal protection works	earthworks	waterbody (artificial)
clearing native vegetation	drainage	ecologically sustainable development	

Land Use Table Comparison

The following tables provide a comparison between the permitted land uses in the *HSLEP* and the permitted land uses in the HLEP. The tables identify land uses that have become “permitted with consent”, “permitted without consent”, and “prohibited” in translating the zones from the *HSLEP* to the HLEP. To compare the change in land uses for a particular property, identify the relevant *HSLEP* zone on the left and the proposed HLEP zone on the top (as identified on the Land Zoning Map).

	RU1 - Primary Production	RU2 - Rural Landscapes	RU4 - Primary Production Small Lots
