

# MARK TAYLOR OVAL

## SURFACE UPGRADE

Council will shortly be undertaking upgrade works at Mark Taylor Oval.

The works will include:

- Renewal of the existing sub surface irrigation and drainage system;
- Laying of natural grass across the oval using an improved sports turf species;
- Construction of an improved turf wicket table;
- Construction of a low retaining wall around the northern end of the oval; and
- Installation of 3m high netting around part of the northern, eastern and western boundaries to assist in retaining balls within the oval.

Construction is expected to commence early August 2021 and be completed in early 2022.

During construction the oval will be unavailable for use. There will be disruptions to the circuit path, at which times alternative pedestrian routes will be provided.

Please take care during these times.

The Waitara Park tennis centre, playground, PCYC and its outdoor forecourt area will not be impacted by the works.
