

1 Seed

A tree's fruit. It falls off and grows into another tree.

2 Sprout

Is also known as germination. A shoot grows up and a root grows down.

3 Seedling

Is when a shoot grows up out of the soil it might get eaten!

4 Sapling

A young tree not old enough to make fruit or flowers yet

5 Maturity

When a tree starts making fruit or flowers this is when trees are at their best

When a tree is really old and decomposing it provides nutrients to the soil so a new tree can grow!

6 Decay
