## **Project Description**

Council is planning to enhance the pedestrian pathway at North Epping Oval by adding fitness equipment and creating pedestrian pathways around the oval. These will connect to the adjacent streetscape and link to the bushland trails in Lane Cove National Park, creating a proposed walking loop.

The aim of the project is to provide improved exercise opportunities at North Epping Oval and enhance community access to the regional open space of Lane Cove National Park. The project will be delivered in two stages, depending on the availability of funding.

Key elements of the first stage include:

- Concrete path around the north and east sides of North Epping Oval.
- East side oval path connecting to part of Beck St, part of Downes St, and the Lane Cove National Park Trail loop.
- Fitness station with outdoor exercise equipment on the north side of the oval along the path.

Funding for the first stage works is provided by the NSW State Government Metropolitan Greenspace Program grant and Hornsby Shire Council.

The second stage of works, including additional paths around the oval and another fitness station, is subject to future funding.

This proposed Fitness Trail is proposed to be constructed by late 2025.
