

# Vine weeds

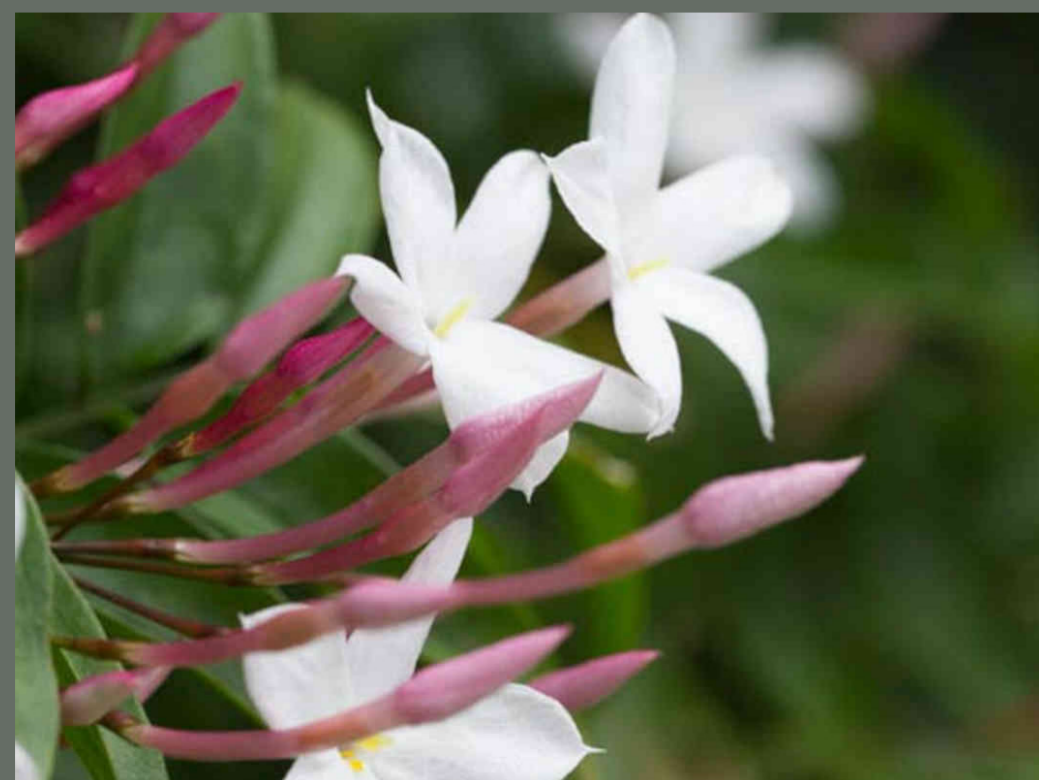

## Some of the most invasive vines in our shire

Madeira Vine (*Anredera cordifolia*)

Cats Claw Creeper (*Dolichandra unguis-cati*)

White Jasmine (*Jasminum polyanthum*)

Morning Glory (*Ipomoea species*)

### There are many vine weeds in Hornsby Shire.

Grown as ornamental plants, they quickly escape gardens and become a major problem, especially in bushland. They smother native vegetation, damage infrastructure, and can even bring down large trees.

Hornsby Shire Council staff, contractors and volunteers spend large amounts of time and money controlling these plants

### How can you help?

Do not plant vine weeds in your garden.

Learn how to identify, control and eradicate vine weeds on your property.
